SUBJECT INDEX

Actinides *(excl. Th, U, Pu)*
Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, T. Koyama and M. Yamawaki 167 (1989) 122

Alloys *("Various" i.e. not listed elsewhere by name)*
History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3
Constitution and thermodynamics of the Mo–Ru, Mo–Pd, Ru–Pd and Mo–Ru–Pd systems, H. Kleykamp 167 (1989) 49
Acitivity measurement and its use in predicting phase relationships in stainless steels, M.C.Y. Lee 167 (1989) 175

Aluminium, Aluminium Alloys and Compounds
Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, C.B. Alcock 167 (1989) 7
Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson 167 (1989) 160
Acitivity measurement and its use in predicting phase relationships in stainless steels, M.C.Y. Lee 167 (1989) 175

Ceramics *("Various" i.e. not listed elsewhere by name)*
Thermodynamics of ceramic breeder materials for fusion reactors, O. Götzmann 167 (1989) 213

Cladding Materials
Activities of metals in an AISI 316LN stainless steel by emf measurements, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 167 (1989) 82
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169

Compatibility and Corrosion
Chromium activity in the Cr–Te system using a CaF_2 emf method, A.M. Azad and O.M. Sreedharan 167 (1989) 89
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 167 (1989) 94
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191
Thermodynamics of ceramic breeder materials for fusion reactors, O. Götzmann 167 (1989) 213
Equilibrium chemistry of nitrogen and potential–pH diagrams for the Fe–Cr–H_2O system in BWR water, D. Cubicciotti 167 (1989) 241
Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, R. Sridharan, D. Krishnamurthy and C.K. Mathews 167 (1989) 265

Computer Calculations, including Modelling
Modeling of heat capacities of metals, O.H. Krikorian and D.Y. Lai 167 (1989) 14
The constant vaporizing composition of UO_2 at 2150 and 2800 K, J.-F. Babelot and M. Hoch 167 (1989) 25
Thermodynamic model of UO_{2+x}, A. Nakamura and T. Fujino 167 (1989) 36
Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76

Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135
Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson 167 (1989) 160
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205
Equilibrium chemistry of nitrogen and potential–pH diagrams for the Fe–Cr–H_2O system in BWR water, D. Cubicciotti 167 (1989) 241

Constitution
Constitution and thermodynamics of the Mo–Ru, Mo–Pd, Ru–Pd and Mo–Ru–Pd systems, H. Kleykamp 167 (1989) 49
Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76
Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson 167 (1989) 160

Diffusion *(incl. Thermodiffusion)*
High-temperature interdiffusion and phase equilibria in U–Mo, L.B. Lundberg 167 (1989) 64

Fission Products
Constitution and thermodynamics of the Mo–Ru, Mo–Pd, Ru–Pd and Mo–Ru–Pd systems, H. Kleykamp 167 (1989) 49
Chromium activity in the Cr–Te system using a CaF_2 emf method, A.M. Azad and O.M. Sreedharan 167 (1989) 89
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 167 (1989) 94
Thermodynamics of vaporisation of caesium molybdate, R.P. Tangri, V. Venugopal, D.K. Bose and M. Sundaresan 167 (1989) 127
Tellurium activities in the Pd–Te system by emf measurements, C. Mallika and O.M. Sreedharan 167 (1989) 181
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205
Thermochemical properties of the alkali hydroxides: a review, R.J.M. Konings and E.H.P. Cordfunke 167 (1989) 251
Determination of thermal properties of $Cs_2Cr_2O_7$(s, *l*) by high temperature Calvet calorimetry, R. Prasad, R. Agarwal, K.N. Roy, V.S. Iyer, V. Venugopal and D.D. Sood 167 (1989) 261
Thermodynamic properties of ternary oxides of fission products from calorimetric measurements, R. Saha, R. Babu, K. Nagarajan and C.K. Mathews 167 (1989) 271

Fuel Cycles
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205

Fuel Reprocessing
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205

Fuels and Fuel Elements: Fast Reactors
Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76
Chromium activity in the Cr–Te system using a CaF_2 emf method, A.M. Azad and O.M. Sreedharan 167 (1989) 89
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 167 (1989) 94
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, T. Koyama and M. Yamawaki 167 (1989) 122
Heat capacity measurements of $U_{0.80}Zr_{0.20}$ and $U_{0.80}Mo_{0.20}$ alloys from room temperature to 1300 K, T. Matsui, T. Natsume and K. Naito 167 (1989) 152
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191

Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205
Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, R. Sridharan, D. Krishnamurthy and C.K. Mathews 167 (1989) 265
Thermodynamic properties of ternary oxides of fission products from calorimetric measurements, R. Saha, R. Babu, K. Nagarajan and C.K. Mathews 167 (1989) 271

Fuels and Fuel Elements: High-Temperature Reactors
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169

Fuel and Fuel Elements: Thermal Reactors
Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, T. Koyama and M. Yamawaki 167 (1989) 122
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191
Oxygen potentials in two-phase mixtures of the system MgU_2O_x $(5 < x \leqslant 7)$, B.S. Madan, C. Mallika, O.M. Sreedharan, P. Rodriguez and S.R. Paranjpe 167 (1989) 278

Fusion Reactors: Blanket Materials *(incl. Lithium)*
Thermodynamics of ceramic breeder materials for fusion reactors, O. Götzmann 167 (1989) 213
Study of adsorption and desorption of water on Li_4SiO_4, V. Schauer and G. Schumacher 167 (1989) 225

Fusion Reactors: Surface Effects
Study of adsorption and desorption of water on Li_4SiO_4, V. Schauer and G. Schumacher 167 (1989) 225

Gases *(excl. Tritium)* **in Metals, Alloys and Ceramics**
Effect of oxygen of hydrogen solubility in zirconium, S. Yamanaka, T. Tanaka and M. Miyake 167 (1989) 231

Graphite and Carbon
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135

Hydrogen and Hydrides
Study of adsorption and desorption of water on Li_4SiO_4, V. Schauer and G. Schumacher 167 (1989) 225
Effect of oxygen of hydrogen solubility in zirconium, S. Yamanaka, T. Tanaka and M. Miyake 167 (1989) 231

History and Nuclear Materials
History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3
Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, C.B. Alcock 167 (1989) 7
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135

Iron and Iron Alloys *(see Steels)*
Activities of metals in an AISI 316LN stainless steel by emf measurements, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 167 (1989) 82
Acitivity measurement and its use in predicting phase relationships in stainless steels, M.C.Y. Lee 167 (1989) 175

Irradiation Effects *(excl. Swelling and Voids)*
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191

Liquid Metals
Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, R. Sridharan, D. Krishnamurthy and C.K. Mathews 167 (1989) 265

Nuclear Fuels and Elements *(general)*
The constant vaporizing composition of UO_2 at 2150 and 2800 K, J.-F. Babelot and M. Hoch 167 (1989) 25
Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, T. Koyama and M. Yamawaki 167 (1989) 122
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135

The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169

Phase Transformations
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135
Heat capacities of uranium–zirconium alloys from 300 to 1100 K, Y. Takahashi, K. Yamamoto, T. Ohsato, H. Shimada, T. Terai and M. Yamawaki 167 (1989) 147
Heat capacity measurements of $U_{0.80}Zr_{0.20}$ and $U_{0.80}Mo_{0.20}$ alloys from room temperature to 1300 K, T. Matsui, T. Natsume and K. Naito 167 (1989) 152
Thermochemical properties of the alkali hydroxides: a review, R.J.M. Konings and E.H.P. Cordfunke 167 (1989) 251

Physical Properties
History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3
Modeling of heat capacities of metals, O.H. Krikorian and D.Y. Lai 167 (1989) 14

Plutonium, Plutonium Alloys and Compounds
History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3
Sublimation studies of plutonium trifluoride, P.D. Kleinschmidt 167 (1989) 131
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205

Refractory Metals and Alloys *(excl. Zr)*
High-temperature interdiffusion and phase equilibria in U–Mo, L.B. Lundberg 167 (1989) 64
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169

Safety – Nuclear Reactors
The constant vaporizing composition of UO_2 at 2150 and 2800 K, J.-F. Babelot and M. Hoch 167 (1989) 25

Sodium
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, R. Sridharan, D. Krishnamurthy and C.K. Mathews 167 (1989) 265

Steels
Activities of metals in an AISI 316LN stainless steel by emf measurements, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 167 (1989) 82
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 167 (1989) 94
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
Equilibrium chemistry of nitrogen and potential–pH diagrams for the Fe–Cr–H_2O system in BWR water, D. Cubicciotti 167 (1989) 241

Structural Materials
Activities of metals in an AISI 316LN stainless steel by emf measurements, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 167 (1989) 82
Acitivity measurement and its use in predicting phase relationships in stainless steels, M.C.Y. Lee 167 (1989) 175

Thermodynamic Properties
History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3
Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, C.B. Alcock 167 (1989) 7
Modeling of heat capacities of metals, O.H. Krikorian and D.Y. Lai 167 (1989) 14
The constant vaporizing composition of UO_2 at 2150 and 2800 K, J.-F. Babelot and M. Hoch 167 (1989) 25
High-temperature heat capacities of UO_2 and doped UO_2, K. Naito 167 (1989) 30
Thermodynamic model of UO_{2+x}, A. Nakamura and T. Fujino 167 (1989) 36
Constitution and thermodynamics of the Mo–Ru, Mo–Pd, Ru–Pd and Mo–Ru–Pd systems, H. Kleykamp 167 (1989) 49

Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76
Activities of metals in an AISI 316LN stainless steel by emf measurements, A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy 167 (1989) 82
Chromium activity in the Cr–Te system using a CaF_2 emf method, A.M. Azad and O.M. Sreedharan 167 (1989) 89
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews 167 (1989) 94
Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105
Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, T. Koyama and M. Yamawaki 167 (1989) 122
Thermodynamics of vaporisation of caesium molybdate, R.P. Tangri, V. Venugopal, D.K. Bose and M. Sundaresan 167 (1989) 127
Sublimation studies of plutonium trifluoride, P.D. Kleinschmidt 167 (1989) 131
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135
Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson 167 (1989) 160
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169
Acitivity measurement and its use in predicting phase relationships in stainless steels, M.C.Y. Lee 167 (1989) 175
Tellurium activities in the Pd–Te system by emf measurements, C. Mallika and O.M. Sreedharan 167 (1989) 181
The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205
Thermodynamics of ceramic breeder materials for fusion reactors, O. Götzmann 167 (1989) 213
Study of adsorption and desorption of water on Li_4SiO_4, V. Schauer and G. Schumacher 167 (1989) 225
Effect of oxygen of hydrogen solubility in zirconium, S. Yamanaka, T. Tanaka and M. Miyake 167 (1989) 231
Thermochemical properties of the alkali hydroxides: a review, R.J.M. Konings and E.H.P. Cordfunke 167 (1989) 251
Determination of thermal properties of $Cs_2Cr_2O_7$(s, *l*) by high temperature Calvet calorimetry, R. Prasad, R. Agarwal, K.N. Roy, V.S. Iyer, V. Venugopal and D.D. Sood 167 (1989) 261
Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, R. Sridharan, D. Krishnamurthy and C.K. Mathews 167 (1989) 265
Thermodynamic properties of ternary oxides of fission products from calorimetric measurements, R. Saha, R. Babu, K. Nagarajan and C.K. Mathews 167 (1989) 271
Oxygen potentials in two-phase mixtures of the system MgU_2O_x $(5 < x \leqslant 7)$, B.S. Madan, C. Mallika, O.M. Sreedharan, P. Rodriguez and S.R. Paranjpe 167 (1989) 278

Thermophysical Properties

Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, C.B. Alcock 167 (1989) 7
Modeling of heat capacities of metals, O.H. Krikorian and D.Y. Lai 167 (1989) 14
High-temperature heat capacities of UO_2 and doped UO_2, K. Naito 167 (1989) 30
Heat capacities of uranium–zirconium alloys from 300 to 1100 K, Y. Takahashi, K. Yamamoto, T. Ohsato, H. Shimada, T. Terai and M. Yamawaki 167 (1989) 147
Heat capacity measurements of $U_{0.80}Zr_{0.20}$ and $U_{0.80}Mo_{0.20}$ alloys from room temperature to 1300 K, T. Matsui, T. Natsume and K. Naito 167 (1989) 152
Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205
Thermochemical properties of the alkali hydroxides: a review, R.J.M. Konings and E.H.P. Cordfunke 167 (1989) 251

Thorium, Thorium Alloys and Compounds

Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, M. Yamawaki, T. Koyama and Y. Takahashi 167 (1989) 113

High-temperature vaporization of thorium–uranium mixed monocarbide (Th_{1-y}, U_y)C, T. Koyama and M. Yamawaki 167 (1989) 122

Tritium

Thermodynamics of ceramic breeder materials for fusion reactors, O. Götzmann 167 (1989) 213

Study of adsorption and desorption of water on Li_4SiO_4, V. Schauer and G. Schumacher 167 (1989) 225

Uranium and Uranium Alloys

History of the application of the generalized Lewis acid–base theory to metals, L. Brewer 167 (1989) 3

Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, C.B. Alcock 167 (1989) 7

High-temperature heat capacities of UO_2 and doped UO_2, K. Naito 167 (1989) 30

High-temperature interdiffusion and phase equilibria in U–Mo, L.B. Lundberg 167 (1989) 64

Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76

Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, W. Boersma-Klein, J. Kistemaker and H.N. Stein 167 (1989) 135

Heat capacities of uranium–zirconium alloys from 300 to 1100 K, Y. Takahashi, K. Yamamoto, T. Ohsato, H. Shimada, T. Terai and M. Yamawaki 167 (1989) 147

Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson 167 (1989) 160

The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, E.K. Storms and D.G. Czechowicz 167 (1989) 169

Recent thermochemical research on reactor materials and fission products, E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr. 167 (1989) 205

Uranium Ceramics

The constant vaporizing composition of UO_2 at 2150 and 2800 K, J.-F. Babelot and M. Hoch 167 (1989) 25

Thermodynamic model of UO_{2+x}, A. Nakamura and T. Fujino 167 (1989) 36

Carburization of stainless steel clad by uranium–plutonium carbide fuel, S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews 167 (1989) 105

High-temperature vaporization of thorium–uranium mixed monocarbide (Th_{1-y}, U_y)C, T. Koyama and M. Yamawaki 167 (1989) 122

The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter 167 (1989) 191

Oxygen potentials in two-phase mixtures of the system MgU_2O_x $(5 < x \leqslant 7)$, B.S. Madan, C. Mallika, O.M. Sreedharan, P. Rodriguez and S.R. Paranjpe 167 (1989) 278

Zirconium, Zirconium Alloys and Compounds

Thermodynamics of the uranium–zirconium system, L. Leibowitz, R.A. Blomquist and A.D. Pelton 167 (1989) 76

Heat capacities of uranium–zirconium alloys from 300 to 1100 K, Y. Takahashi, K. Yamamoto, T. Ohsato, H. Shimada, T. Terai and M. Yamawaki 167 (1989) 147

Heat capacity measurements of $U_{0.80}Zr_{0.20}$ and $U_{0.80}Mo_{0.20}$ alloys from room temperature to 1300 K, T. Matsui, T. Natsume and K. Naito 167 (1989) 152

Effect of oxygen of hydrogen solubility in zirconium, S. Yamanaka, T. Tanaka and M. Miyake 167 (1989) 231

CONTENTS

Preface vii

Section 1. Historical Perspectives and Basic Properties of Metals and Alloys

History of the application of the generalized Lewis acid–base theory to metals, *L. Brewer* 3
Thermodynamic data for uranium and thorium intermetallic compounds: a historical perspective, *C.B. Alcock* 7
Modeling of heat capacities of metals, *O.H. Krikorian and D.Y. Lai* 14

Section 2. Uranium Dioxide

The constant vaporizing composition of UO_2 at 2150 and 2800 K, *J.-F. Babelot and M. Hoch* 25
High-temperature heat capacities of UO_2 and doped UO_2, *K. Naito* 30
Thermodynamic model of UO_{2+x}, *A. Nakamura and T. Fujino* 36

Section 3. Fission Reactor Alloys

Constitution and thermodynamics of the Mo–Ru, Mo–Pd, Ru–Pd and Mo–Ru–Pd systems, *H. Kleykamp* 49
High-temperature interdiffusion and phase equilibria in U–Mo, *L.B. Lundberg* 64
Thermodynamics of the uranium–zirconium system, *L. Leibowitz, R.A. Blomquist and A.D. Pelton* 76
Activities of metals in an AISI 316LN stainless steel by emf measurements, *A.M. Azad, O.M. Sreedharan and J.B. Gnanamoorthy* 82
Chromium activity in the Cr–Te system using a CaF_2 emf method, *A.M. Azad and O.M. Sreedharan* 89
Thermochemistry of metal-rich chromium telluride and its role in fuel–clad chemical interactions, *R. Viswanathan, M. Sai Baba, D. Darwin Albert Raj, R. Balasubramanian, B. Saha and C.K. Mathews* 94
Carburization of stainless steel clad by uranium–plutonium carbide fuel, *S. Rajendran Pillai, S. Anthonysamy, P.K. Prakashan, R. Ranganathan, P.R. Vasudeva Rao and C.K. Mathews* 105

Section 4. Vapor Species and Vaporization

Thermodynamics of the vaporization of non-stoichiometric thorium monocarbide $ThC_{1\pm x}$, *M. Yamawaki, T. Koyama and Y. Takahashi* 113
High-temperature vaporization of thorium–uranium mixed monocarbide $(Th_{1-y}, U_y)C$, *T. Koyama and M. Yamawaki* 122
Thermodynamics of vaporisation of caesium molybdate, *R.P. Tangri, V. Venugopal, D.K. Bose and M. Sundaresan* 127
Sublimation studies of plutonium trifluoride, *P.D. Kleinschmidt* 131
Use of thermochemical modelling for the analysis of energy extraction in a gas-core fission reactor, *W. Boersma-Klein, J. Kistemaker and H.N. Stein* 135

Section 5. Basic Properties of Metals and Alloys

Heat capacities of uranium–zirconium alloys from 300 to 1100 K, *Y. Takahashi, K. Yamamoto, T. Ohsato, H. Shimada, T. Terai and M. Yamawaki* 147
Heat capacity measurements of $U_{0.80}Zr_{0.20}$ and $U_{0.80}Mo_{0.20}$ alloys from room temperature to 1300 K, *T. Matsui, T. Natsume and K. Naito* 152
Evaluation and thermodynamic analysis of phase equilibria in the U–Al system, *M.E. Kassner, P.H. Adler, M.G. Adamson and D.E. Peterson* 160
The Gibbs energy of formation for URe_2 obtained from the interaction between UN and Re, *E.K. Storms and D.G. Czechowicz* 169
Acitivity measurement and its use in predicting phase relationships in stainless steels, *M.C.Y. Lee* 175
Tellurium activities in the Pd–Te system by emf measurements, *C. Mallika and O.M. Sreedharan* 181

Section 6. Fission and Fusion Reactor Materials

The chemical constitution of the fuel–clad gap in oxide fuel pins for nuclear reactors, *R.G.J. Ball, W.G. Burns, J. Henshaw, M.A. Mignanelli and P.E. Potter* 191
Recent thermochemical research on reactor materials and fission products, *E.H.P. Cordfunke, R.J.M. Konings and E.F. Westrum, Jr.* 205
Thermodynamics of ceramic breeder materials for fusion reactors, *O. Götzmann* 213
Study of adsorption and desorption of water on Li_4SiO_4, *V. Schauer and G. Schumacher* 225
Effect of oxygen of hydrogen solubility in zirconium, *S. Yamanaka, T. Tanaka and M. Miyake* 231

Section 7. Aqueous Systems

Equilibrium chemistry of nitrogen and potential–pH diagrams for the Fe–Cr–H_2O system in BWR water, *D. Cubicciotti* 241

Section 8. Basic Properties of Compounds

Thermochemical properties of the alkali hydroxides: a review, *R.J.M. Konings and E.H.P. Cordfunke* 251

Determination of thermal properties of $Cs_2Cr_2O_7$(s, *l*) by high temperature Calvet calorimetry, *R. Prasad, R. Agarwal, K.N. Roy, V.S. Iyer, V. Venugopal and D.D. Sood* 261

Thermodynamic properties of ternary oxides of alkali metals from oxygen potential measurements, *R. Sridharan, D. Krishnamurthy and C.K. Mathews* ... 265

Thermodynamic properties of ternary oxides of fission products from calorimetric measurements, *R. Saha, R. Babu, K. Nagarajan and C.K. Mathews* 271

Oxygen potentials in two-phase mixtures of the system MgU_2O_x ($5 < x \leqslant 7$), *B.S. Madan, C. Mallika, O.M. Sreedharan, P. Rodriguez and S.R. Paranjpe* 278
